24 August 1959

MEMORANDUM FOR THE RECORD

SUBJECT: [] War and Emergency Plan

25X1

25X1

1. On 21 August 1959 I visited [] to discuss and assist with the war and emergency planning for that activity. I had a two-hour conversation with [] going over their initial draft of the support annex of the plan. Their planning had not been coordinated with the training side, nor had the latter given them a copy of their plan. From now on this planning will proceed on a coordinated basis. Mr. [] hopes to be able to send a revised draft of his effort to Headquarters for further study within two weeks (7 September). I believe Bob is going to do a good job.

2. I told Bob and Ray about my visit to [] office (Log Planning Officer) the preceding day and his commitment to commit a member of his staff to visit [] for two or three days in a week or so to give them a hand with the logistical planning and my further hope that we might be able to get such an individual to do some of the leg work for us. I suggested to Bob that he have each of his subordinate components prepare a contribution to his plan; however he was not very optimistic about what he might be able to get from them. I pointed out that the [] support plan addressed itself primarily to the two extreme situations--emergency relocation and all-out war--and expressed my belief that bringing the planning into line with the specific requirements of the training activity might fill in contingency situation requirements.

3. After talking with Ray and Bob, I went with them [] where we held a briefer discussion with [], answering various questions that have been puzzling them. I gave both the training and support components copies of the Training Annex to the Global War Plan and the draft plans of the Headquarters Training, Field Training, and Clerical Training schools. I hoped that this would serve as guidance enabling us to produce a more uniform-appearing type of subordinate plan throughout OTR. I told them to give me a ring and I would come back anytime they felt they needed more help.

25 YEAR RE-REVIEW

SECRET

4. After my return to Headquarters I called the Logistics Planning Office and made arrangements to get copies of their portable base logistical guide to be sent ^{25X1}

25X1

5. feels that to come up with a definitive plan, ^{25X1}
 should be advised as to the exact number of personnel OTR might send there from Headquarters.
